

## PRESENTATION

# Project Purpose, Objectives, & Approach

**LOUISE HEAPS**

**Project Director & WWF Global  
Lead on Sustainable Blue**

**LORENA RAMIREZ**

**Project Coordinator,  
Landell Mills**

## Project Purpose

Identify and make recommendations for the **applicability of sustainable financing and risk management models and approaches for coral reef ecosystems** in targeted, high-opportunity sites in four countries, namely Fiji, Indonesia, the Philippines and Solomon Islands, towards increasing the climate resilience of coastal businesses, communities and their livelihoods.

# Project Objectives

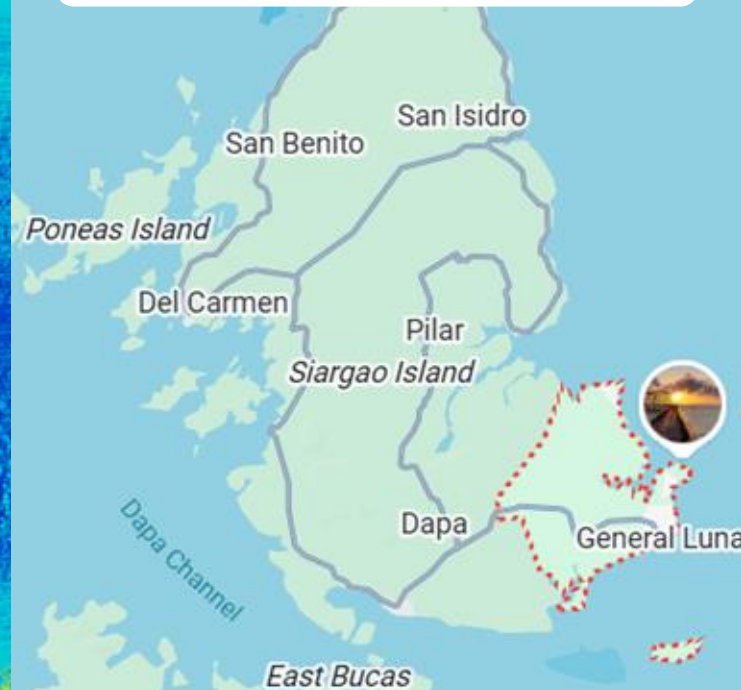

- ★ **Building the case for effective coral reef protection, restoration and sustainable management** by defining the range of goods and services they provide and quantifying the environmental, social and economic risks associated with their damage;
- ★ **Implementing strong policies and governance approaches** to underpin their protection, restoration and sustainable management; and
- ★ **Assessing viable options for sustainable financing and risk management** models and approaches, to optimize and complement the limited public funds allocated for coral reef protection and restoration.

# Project Sites

**Nusa Penida,  
Klungkung Regency,  
Indonesia**

**General Luna,  
Siargao, Philippines**

**Arnavon Community  
Marine Park,  
Solomon Islands**

**Denarau - Malolo,  
Fiji**

# Supported by

**Global Multilateral Family  
of Trust Funds designed  
to help countries meet  
obligations to multilateral  
environmental agreements  
(MEAs)**

**ACiIFF**

**A multi-donor trust fund  
managed by the ADB,  
supporting the  
development of financial  
risk management  
products to enhance  
climate resilience**

# Regional Collaboration

# Key Assessments in Indonesia, Fiji, and Philippines (Insurance)

# **Key Assessments in Solomon Islands (Trust Fund)**

**Inception report**

**Agreement with the  
Arnavon  
Community Marine  
Park**

**Climate Risk  
Assessments**

**Reef Surveys and  
field  
consultations**

**Reef  
Vulnerability  
Assessments**

**Valuation  
assessments  
and Cost Benefit  
Analysis**

**Restoration Plan  
and Gender  
action plan**

**Recommendations  
& Action plan for  
Structuring Fund**

**Operationalisation  
and pilot initiatives**

**Finance Model for  
ACMP including  
training**

# Key Project Outputs

**4 country reports with  
7 detailed technical  
reports  
as annexes**

**Final TA Report**

**4 Videos**

**6 Factsheets**

**Training Toolkit**

**Summary notes  
of final in-country  
workshops**

# Workshop Objectives

1

**Highlight the collective approach** taken in the priority sites in terms of building the case for and assessing the feasibility of coral reef conservation and risk transfer financing solutions.

2

**Present key findings and recommendations:** sharing the latest analysis of current threats and proposed solutions.

3

**Discuss the key lessons learned:** highlighting the main challenges and opportunities for coral reef conservation and risk transfer financing in this region.

4

**Discuss how to deliver and scale these outcomes nationally and regionally (Asia-Pacific)**

5

**Define clear next steps and stakeholder commitments** - synthesizing workshop discussions into a shared understanding of priority actions, responsible actors, and pathways to support implementation efforts both nationally and regionally.
