CAREC Strategic Action Plan on Agriculture and Food Security Development, 2026-2030: Core Proposition

- ❖ **National food security and regional trade are mutually reinforcing**
 - Strong domestic production essential for food sovereignty and stability
 - Regional trade reduces exposure to supply shocks and price volatility
 - Strategic Action Plan promotes a dual approach: strengthening national systems while connecting them through regional value chains
- ❖ **Corridor-Based Development**
 - CAREC transport corridors transformed into integrated agri-food economic corridors
 - Connect production areas with processing, storage, logistics, and markets
 - Resources targeted where they generate highest returns
- ❖ **Evidence-Based Decision Making**
 - Investments guided by comparative analysis, commodity trade flows, and climate risk assessments
 - Greater transparency, accountability, and coordination across countries
