

Mission Possible

Fintech Today: Solving Key Financial
Development Challenges

September 2025

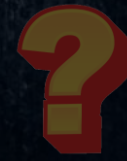

DO YOU HAVE 72 HOURS IN A DAY?

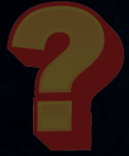

How to expand access to banking in underserved and rural communities

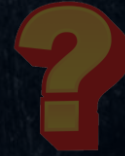

How to design digital banking services for differently-abled users

How to create safer and more user-friendly alternatives to PIN-based authentication for payments

How to expand access to banking in underserved and rural communities

How to protect customer data while experimenting with fintech solutions

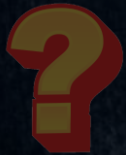

How to build advanced RegTech tools that simplify compliance, reporting, and governance

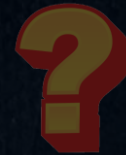

How to detect financial crime and money laundering more effectively with new technologies

TOO MANY CHALLENGES, TOO LITTLE TIME

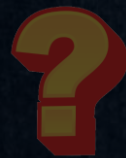

How to streamline eKYC, regulatory reporting, and cross-border payments

How to expand access to affordable credit for micro, small and medium enterprises (MSMEs)

How to make insurance and protection products more accessible for low-income households

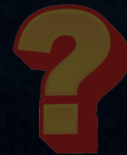

How to safeguard vulnerable groups from predatory lending practices

How to use tokenisation to improve efficiency and reduce system costs

How to strengthen digital identity and eKYC frameworks without adding friction to users

How to build interoperable authentication systems across banks and fintechs

THE GREATEST ECOSYSTEM EVER

**Institutions
move like glaciers**

**Ecosystems move
like lightning**
