

Korea's Open Banking Journey

| Key Points of Success

Korean Open Banking Model

In KR Model, all participants can access functionalities and data from all service providers via **a single, unified access interface** to Open Banking and the agreement.

A stylized globe is centered in the background, rendered in a light blue, pixelated or dotted style. Overlaid on the globe is a network of thin, light blue lines connecting small circular nodes. These nodes are arranged in a complex, geometric pattern that resembles a geodesic dome or a molecular structure. The entire scene is set against a solid, dark blue background.

Impact and Expansion

Collaboration & Connectivity
